CAREER OBJECTIVES

I am a results-driven Full Stack Web Developer with practical experience in building scalable web applications using the MERN stack. I specialize in developing dynamic user interfaces, designing RESTful APIs, and managing efficient database architectures.

Having developed and deployed multiple real-world applications, including SaaS-based systems, I focus on performance optimization, clean code architecture, and seamless user experience. I am committed to pushing technical boundaries and contributing to high-quality, production-ready software solutions.

EDUCATION

COMSATS University Islamabad, Pakistan

(2023 – Present)

Bachelors of Computer Science (BSCS)

Post Graduate College, Pakistan

2021-2023

Intermediate of Computer Science (ICS)

PROFESSIONAL EXPERIENCE

Full Stack Developer (Student Level)

(2023 – Present)

Responsibilities:

- ❖ Engineered full-stack web applications using React, Node.js, and Express.js with modular and scalable architecture
- ❖ Designed and implemented RESTful APIs for efficient client-server communication
- ❖ Developed dynamic dashboards and interactive UI components using modern frontend practices
- ❖ Managed databases using MongoDB, ensuring optimized queries and structured data handling
- ❖ Deployed and maintained applications on Vercel and cloud platforms for production access
- ❖ Utilized Git-based workflows for version control, collaboration, and code management
- ❖ Focused on performance optimization, debugging, and improving application scalability

PROJECT EXPERIENCE

AdFlow Pro – SaaS Web Application (MERN Stack)

- ❖ Architected and developed a full-stack SaaS platform for advertisement workflow management
- ❖ Implemented secure and scalable REST APIs using Node.js and Express.js
- ❖ Designed real-time interactive dashboards using React
- ❖ Structured MongoDB database for efficient data storage and retrieval
- ❖ Deployed production-ready application on Vercel

Full-Stack Portfolio / Resume Platform (React)

- ❖ Developed a modern, responsive portfolio platform with reusable component architecture
- ❖ Integrated smooth navigation, animations, and optimized UI/UX design
- ❖ Ensured cross-device compatibility and performance optimization

GitHub UI Clone (Frontend Engineering Project)

- ❖ Engineered a pixel-perfect GitHub interface clone using React
- ❖ Applied component-based architecture and responsive design principles
- ❖ Focused on UI accuracy, performance, and maintainable code structure

SKILLS

Technical Skills

- ❖ **Frontend:**(HTML, CSS, JavaScript, React, Bootstrap 5)
- ❖ **Backend:**(Node.js, Express.js, Supabase, PHP (Laravel))
- ❖ **Databases:**(MongoDB, MySQL, PostgreSQL)
- ❖ **Tools&Platforms:**(Git, GitHub, GitHub Pages, Vercel, Netlify, Railway, Render, Fly.io)

CORE COMPETENCIES

- ❖ Full Stack Web Application Development
- ❖ API Design & Integration
- ❖ Scalable System Architecture
- ❖ Performance Optimization
- ❖ Problem Solving

Languages: English (Professional), Urdu (Native).
